About

I have always had a strong passion for education. As a kid, I would play pretend school and role play as a teacher with my younger brothers. This passion has consistently evolved and solidified in my pursuit for student leadership positions and advising at the University of California, San Diego. As a result, this constructed the common theme that is incorporated in all of my experiences: I believe in the power of education and the pursuit of knowledge.

From attending University of California San Diego, I fell in love with the process of learning and picking up varied skills along the way. This resulted in me being involved in different areas of student life on campus which expanded my scope of impact. As a result, I have been able to bond and work with individuals from varied areas and positions without expecting them to conform to my way of thinking, working, or living.

Now as a young professional hoping to utilize my passion in learning and empowering others, I want to be challenged in my working environment. I am a quick thinker who works well with others and will never turn down a challenge because my experiences have taught me that learning from failures is the most powerful knowledge of all.
